

Why Have a Home Inspection?

The purchase of a home may be the biggest financial decision you'll ever make. The best surprise is no surprise. Knowledge and understanding of all aspects of your home is our goal. You are encouraged to attend your inspection to gain a better understanding of your home and how things work. Your inspector will offer repair and maintenance suggestions along with useful upgrades during the inspection.

What to Expect at Your Home Inspection

Your inspection will be done in a non-intrusive visual standard on accessible components and systems inside and outside your home. All inspections exceed ASHI® standards, the leading authority in the home inspection industry.

For more information on ASHI® refer to the web site: www.ashi.com

Maximize Your Inspection

Please make sure all utilities are turned on for the inspection. This will help to eliminate unwanted surprises.

We discount for active military.

*We support the
Wounded Warrior Project*
